

The International Summer School for Doctoral Students

“Modern and Sustainable Chemical Risk Assessment and Mitigation” (PhD-RISK 2026)

Info:

Date: 11-15 May 2026

Location: Faculty of Chemistry,
University of Gdańsk, Poland

Target group: PhD students

The school will be conducted in English, and international participants are eligible for full funding, (travel & accommodation, subsistence).

Main Topics:

- Introduction to modern and sustainable chemical risk assessment and mitigation
- Current experimental approaches in the exposure and hazard assessment of chemicals
- Modern computational technologies (AI & ML) in risk prediction and mitigation processes
- Modern and sustainable technologies for the reduction and mitigation of chemical risks

WHY TO APPLY?

- ✓ International lecturers & experts
- ✓ Hands-on AI & ML workshops, practical case studies
- ✓ Fieldwork and laboratory exercises
- ✓ Networking with young researchers
- ✓ Certificate of participation & ECTS points
- ✓ Microcredential upon completion
