beekeeping

A Well Established Project of Beekeeping and Bee Products

- An officially registered native bee ecotype: Y ğ lca Bee
- A European Entrepreneurship Award

- The first honey production forest in Türkiye
- Patented production of flower honey, chestnut honey, pollen and propolis

- Special projects configured for kids, women and local producers
- An on-going academic focus on bee venom and its prospective fields of usage in cosmetics

- A product on anti-aging released in International markets based on a dissertation prepared at Düzce University
- The first Apiair application in the World for asthma and copd patients

- An upcoming international Congress entitled Bee-keeping and Bee Products which will be held in October -6,2023

Accreditation, Academic Evaluation and Quality Coordination Office

It was established to carry out the internal and external quality assurance of education, research, social contribution activities and administrative services at Düzce University and the accreditation processes of the programs, and the duties, authorities and responsibilities defined within this scope.

The main fields of activity of the Accreditation, Academic Evaluation and Quality Coordination Office are to ensure that the activities within the scope of our University's accreditation, academic evaluation, quality, internal control and the Higher Education Quality Board (YÖKAK) are carried out effectively.

Experimental Animals Application and Research Center

Experimental Research

The center contributes to the experimental studies of researchers from within the university and other universities by providing experimental animals, physical infrastructure and necessary laboratory environment.

High Standardization

It enables scientific studies to be conducted with high standardization, in accordance with animal welfare and ethical rules.

Infrastructure and Technical Support

The center provides the necessary infrastructure and technical support for applications using laboratory animals for scientific research and education purposes at Düzce University, and provides high quality and international ethical standards in the production, care and use processes of conventional laboratory animals (Rats, Mice and Rabbits) by paying attention to animal welfare and health issues of laboratory animals.

Rating Coordination Office

Growth

The coordination is to ensure that the necessary sustainable practices are integrated into the University activities in order to correctly determine the place of Düzce University in international university rankings and to take its place at higher levels in the rankings.

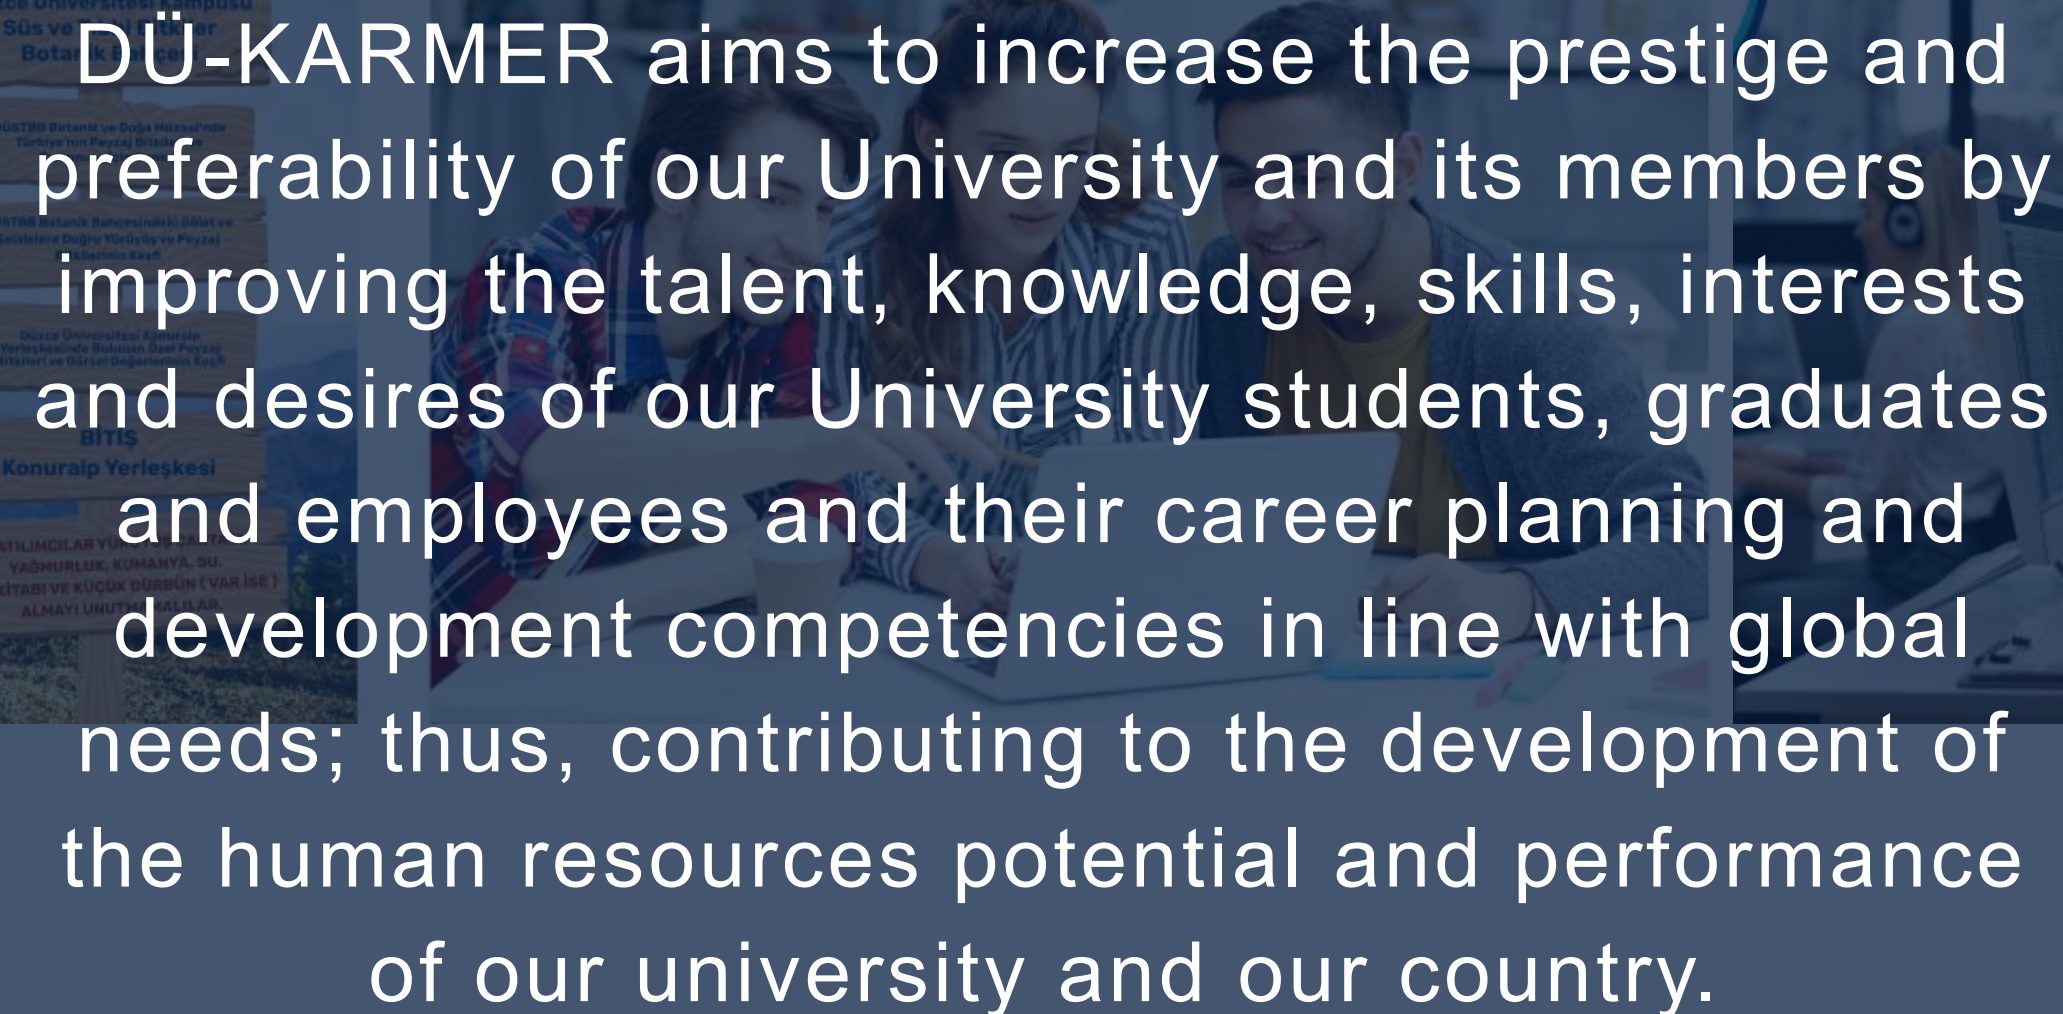

Education Coordination Office

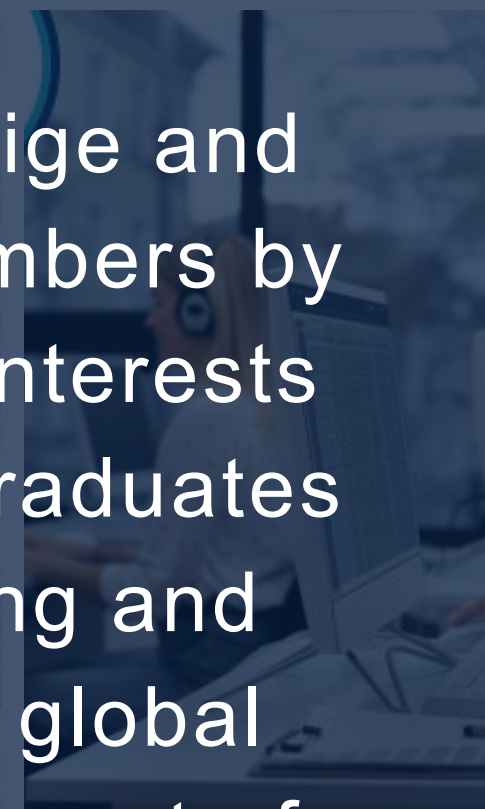

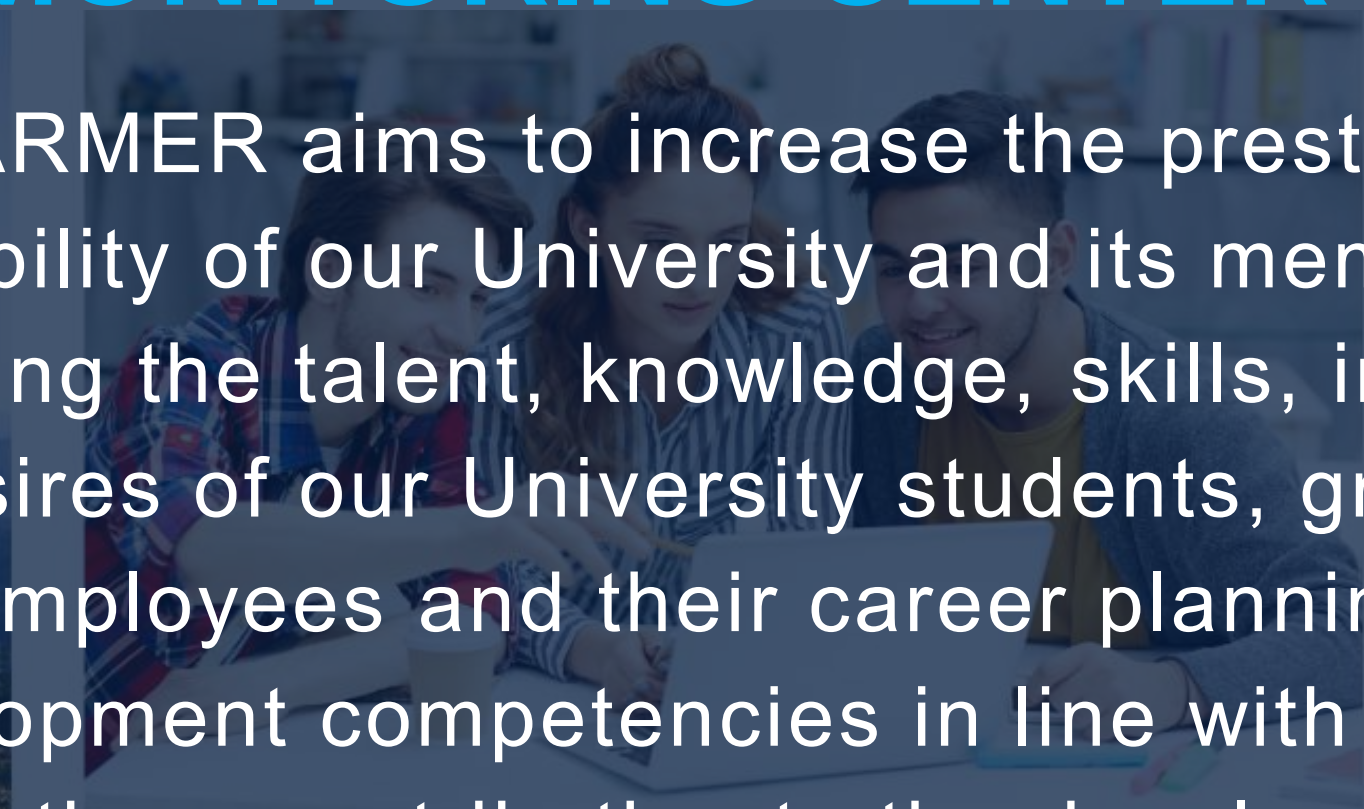

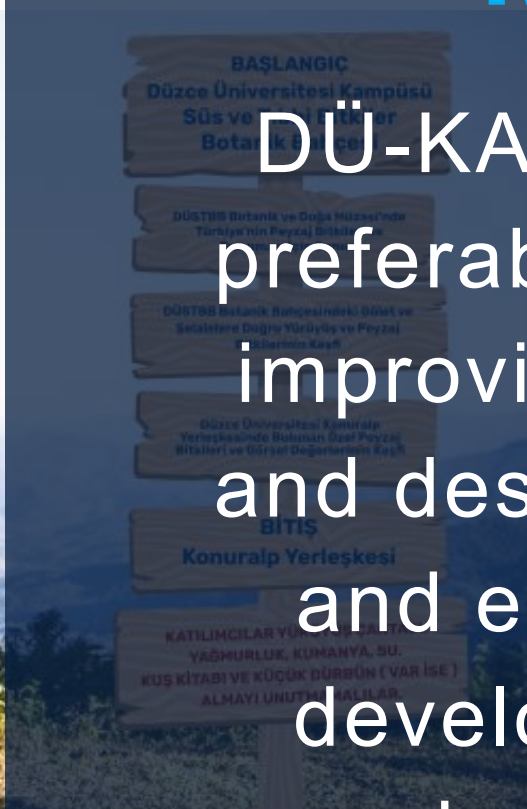

Düzce University Education Coordination Office was established to provide consultancy and support in the planning, implementation and evaluation processes of associate degree, undergraduate and graduate education programs in accordance with the legislation.

CAREER DEVELOPMENT AND GRADUATE MONITORING CENTER

DÜ-KARMER aims to increase the prestige and preferability of our University and its members by improving the talent, knowledge, skills, interests and desires of our University students, graduates and employees and their career planning and development competencies in line with global needs; thus, contributing to the development of the human resources potential and performance of our university and our country.

Industry And Business Cooperation and Research Center

The aim of the center is to combine the knowledge in the university with the experience and practical application in the industry and business world, to support the increase in the service quality and cultural levels of the companies operating in the sector, to increase national and international competitiveness, to lead technological development, to contribute to economic development, and to reveal new business and product potentials.

In order to increase the participation of our university in international programs and to benefit from these programs, information, partner search and matching activities are carried out. In addition, in order to help small and medium-sized enterprises innovate and grow internationally, services are provided to our university and companies in the region through the Enterprise Europe Network:

SME Competitiveness Program, which is jointly financed by the Single Market and Horizon 2020 programs of the European Union. Activities are carried out to ensure the competitiveness and sustainability of enterprises, to establish and grow SMEs with services provided to academic/non-academic entrepreneurs and companies in the fields of creating international commercial collaborations, transferring innovative products and technologies to new markets, and research project partnerships.

Application and Research Center for Industrial Recycling of Agricultural Wastes

Application and Research Center for Industrial Recycling of Agricultural Wastes

Application and Research Center for Industrial Recycling of Agricultural Wastes

Our products (Colored and colorless mulch, Myceliated Oyster and Reishi mushroom composts, dried medicinal mushrooms; Oyster, Shiitake and Reishi mushrooms, bird nests produced from agricultural wastes and more) of the Agricultural Waste Recycling Application and Research Center (DÜTAGAM) are exhibited at events such as TEKNOFEST.

Exhibition

Technopark Coordination Office

Düzce University, with its young and dynamic academic staff and management with international experience and foresight, has achieved many firsts in many areas and is the only university among newly established universities to establish a Technopark. DüzceTeknopark has a management and executive board with broad participation, which creates a difference with a flexible management approach that is future-oriented, open to development and able to act with the priorities of the sector and the region.

Technopark aims to play an active role in creating an environment that will support the production of innovative ideas and companies that produce or use advanced technology by encouraging entrepreneurship, transferring the University's academic knowledge to the industry and thus strengthening university-industry cooperation, and transforming the results of this cooperation into economic value.

Turkish Language Teaching Application And Research Center (Dü-tömer)

The aims of the center are as follows:

1

To teach Turkish to foreigners, Turkish children abroad and other willing people in Türkiye and abroad; To establish units in Türkiye and abroad in order to promote Türkiye and Turkish culture,

2

To open courses, provide internships, and prepare introductory guide publications regarding the country in which they will work for academicians and teachers assigned by relevant public institutions and organizations to teach Turkish in Türkiye and abroad,

3

To work to improve language teaching methods applied in Turkish language education and Turkish language and literature education departments at universities, to conduct research and applications regarding language teaching methods,

4

To conduct comparative studies between Turkish and foreign languages in order to make Turkish teaching more efficient, to develop relevant materials and assessment-evaluation tools,

5

To organize short-term Turkish courses for Turkish children living abroad,
